1. NATURE AND CONTINUANCE OF OPERATIONS

Acadia Resources Corp. (the "Company") is incorporated under the Business Corporations Act, British Columbia and is considered to be in the exploration stage with respect to its mineral properties. Based on the information available to date, the Company has not yet determined whether its mineral properties contain ore reserves.

The Company's head office, principal address and registered records office is 408 – 837 West Hastings Street, Vancouver, British Columbia, Canada, V6C 3N6.

The recovery of the amounts comprising mineral properties and deferred exploration costs is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These unaudited condensed interim financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred ongoing losses. A number of alternatives including, but not limited to selling an interest in one or more of its properties or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due. The Company estimates it has sufficient working capital to continue operations for the next fiscal year.

These unaudited condensed interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's cash and accounts payable and accrued liabilities, and due to related party approximate their carrying values due to their short term nature. As at February 28, 2013, the Company did not have any other financial instruments.

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's receivables consist primarily of tax receivables due from federal government agencies. The maximum exposure to credit risk is equal to the fair value or carrying value of the financial assets.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. Such fluctuations may be significant.

(a) Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(b) Foreign currency risk

The Company is not exposed to foreign currency risk on fluctuations in exchange rates. The Company does not hedge its currency risk.

10. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd…)

Market risk (cont'd…)

(c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold and other precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company. The Company does not hedge its currency risk.

Capital management

The capital structure of the Company consists of equity attributable to common shareholders, comprising of issued capital, reserves and deficit.

The Company's objectives when managing capital are to: (i) preserve capital, (ii) obtain the best available net return, and (iii) maintain liquidity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and investments.

The Company's policy is to invest its excess cash in highly liquid, fully guaranteed, bank-sponsored instruments payable on demand. This strategy is unchanged from fiscal 2012.

The Company is not subject to externally imposed capital restrictions.

11. SIGNIFICANT TRANSACTION

The Company is investigating oil and gas opportunities in a central Saharan country in Africa. In that regard, it has entered into an exclusive option agreement with a private company ("Privateco"), which has signed a memorandum of understanding on a prospective onshore exploration block within Africa.

Pursuant to the terms of the option agreement, the Company has the right to negotiate with Privateco in respect of a possible merger, investment or acquisition, to acquire up to 100% of Privateco's interest in the block, as well as Privateco's interest, if any, in any additional blocks.
